Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-34 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a data processing method and system comprising a data compression decoder producing a first compression parameter data representative of decisions made by a compression algorithm when a first source data is compression encoded, and the first parameter data on request via a communication apparatus to one of a data processor or a data compression encoder, the data compression encoder being operable to compression encode a combination of the first and second uncompressed data in accordance with the compression algorithm using the first parameter data, wherein the data communication apparatus is operable to communicate the first and second uncompressed data, and the first parameter data separately via a communications channel provided via the data communications apparatus.

It is noted that the closest prior art of record (Wells et al. US Patent no. 6310915) teaches a similar processing method and system, however, Wells et al. fails to particularly teach or suggest *"a first parameter data on request via a communication apparatus to one of a data processor or a data compression encoder, a data compression encoder being operable to compression encode a combination of the first and second uncompressed data in accordance with a compression algorithm using the first parameter data, wherein the data communication apparatus is operable to communicate the first and second uncompressed data, and the first parameter data separately via a communications channel provided via the data communications apparatus."* as specified in the claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
